A Guide to Both Wisdom and Sherlock Holmes

By N N Taleb

We Sherlock Holmes fans, readers, and secret imitators need a map. Here it is. Peter Bevelin is one of the wisest people on the planet. He went through the books and pulled out sections from Conan Doyle's stories that are relevant to us moderns, a guide to both wisdom and Sherlock Holmes. It makes you both wiser and eager to reread Sherlock Holmes.

The Empirical Skeptic

By Jordan Hedberg

I am an amateur student of decision making under uncertainty, and although I enjoyed Sherlock Holmes in my younger days, I never really made the connection between the stories, empirical skepticism and how to make decisions with partial information. I am simultaneously ashamed and excited to now reread all the classic cases of Arthur Conan Doyle's fine penmanship.

This is much more than a collection of quotes, it is a way to learn the powers of observation, understand the limits of our mind and counter the narrative fallacy with what else? A narrative.

Wonderful and enjoyable book on so many levels. A book that will be reread many times

Another Gem from Peter Bevelin

By J Koster

I can't say it much better than Nassim Taleb did in his review when he said that Peter Bevelin is one of the wisest people on the planet and that this book will make you wiser and eager to either read or reread Sherlock Holmes. It is such a benefit to the learning process to have someone wiser than you pick out what he thinks are the most important and relevant things he reads about particular subjects and then share that knowledge with the world. Peter did it with his previous books, and he has done it yet again with this one.
