Promote quality patient care. Build confidence. Ensure safe practice.

Help your students develop and practice the critical assessment, clinical reasoning, and nursing care skills they need to deliver safe and effective patient care in a controlled, risk-free environment.

51 structured simulation scenarios—34 in print and 17 on DavisPlus, the F.A. Davis password-protected site—cover the entire nursing curriculum. Each simulation scenario focuses on a defined clinical domain, critical knowledge and skills, levels of competency, evidenced-based practice guidelines, National Patient Safety Goals, and research-based design characteristics.

Simulations are presented staged over time, with expected right and wrong student actions and your best responses and guidance. Guidelines for reflection are included for each scenario.

Perfect to use with your computerized patient simulators in the lab or with live actors in class!

The Instructor's Volume provides all of the information found in the Learner Volume, as well as the answers to the student exercises and everything you need to set up, administer, facilitate, and run clinical simulations!

Receive the Instructor Volume for FREE when you adopt 20 or more copies of the Learner Volume!

Save hours of time and quickly set up for clinical with Pre-Programmed Instructor Volume for Laerdal manikins. [Click here for more information and download a sample scenario.](#)
