really love this book

By Amy

I really, really love this book. I love the different shapes for coloring and I like how many colors there are. My favorite thing is never really knowing what I'll uncover until halfway through. It has a variety of images from geometric shapes to animals to architecture. Hopefully they come out with more of these books because if they're as good as the first, I'll be buying them all.

Old school color-by-number

By C. Barrett

I love that this is like old color-by-number, where you don't really have any idea what you're coloring until you start filling it in. If you want to know what the finished pictures are, you can look in the back. I will try to upload a picture, too. I like most of the designs, but I will color even the ones that I don't care for because it's fun. The pictures are printed one-sided on heavy paper. I've used Stabilo 88's, Sharpie fine points, and colored pencils. Neither marker bled all the way through the paper, but I keep an extra sheet underneath anyway, just incase. The book itself is pretty big - about 14.5"x 10.5". Some may have trouble seeing the greyed numbers, but I haven't had too much trouble with it and I like that I can't see the numbers in the finished designs. I hope there will be more versions of Color Quest released in the near future.

Fun and intricate.

By Prettyinpink27

I love how challenging and intricate the designs are. If you love to color (especially with hidden pictures) and like to spend a long time on a page (like me) then you'll love this book. I don't like easy coloring pages so this is great. The numbers are small and you need to color under a light for best results. You get a lot of pages to color and while there is a key, I enjoy not knowing what I'm coloring until the picture reveals itself. I mostly use gel pens because each section is pretty small. But colored pencils also work on the pages with larger shapes. Enjoy!
