MATCHING SUPPLY WITH DEMAND: AN INTRODUCTION TO OPERATIONS MANAGEMENT BY GERARD CACHON, CHRISTIAN TERWIESCH PDF

MATCHING SUPPLY WITH DEMAND by Cachon and Terwiesch is the most authoritative, cutting-edge book for operations management MBAs. The book demands rigorous analysis on the part of students without requiring consistent use of sophisticated mathematical modeling to perform it. When the use of quantitative tools or formal modeling is indicated, it is only to perform the necessary analysis needed to inform and support a practical business solution.

Excellent textbook, but do NOT buy Kindle edition

By Alla

The textbook is very easy to follow, has great examples, very accessible and actually interesting to read. However buying this book on Kingle was a big mistake. Yes, it's great to read the material, however there are many tables that the text refers to, and Kindle doesn't make it easy to click on tables and then go back to text. It is especially hard to do problems, when you need to go back to the specific pages or find formulas or a table. It's doable, but would have been much much easier with a physical book. Yes, Kindle has 'bookmark' and 'highlight' functionalities, but they are hard to use and not intuitive. Until Kindle can offer touch-screen and be more intuitive, I'll stick to reading only books with plain text on it.

Worthless - 1 star because the system won't let me give a negative score

By Operations Mgt Student

This exam book is a waste of money. I bought the book to support an Operations Management class thinking that the extra questions and prep material would help. I was disappointed when I looked though realizing that the writers and editors obviously forgot to proof their work. The questions are full sentences with a key word or two omitted. Theoretically, you would pick the "missing" word from the multiple choice options below

the question. For some questions, there are answers. Unfortunately, for a good percentage of the questions, only one of answers is an Operations Management term, the remaining three answers are: "1990 Clean Air Act", "28 hour day, and "33-Strategies of War.." - none of which have anything to do with the material or chapter topics. This error is repeated throughout the book in varying degrees.

In addition to the the worthless answers/questions, many of the equations and graphics are missing, instead, showing only a graphics place holder.

I am convinced that the editors use a template to churn out textbook review questions and the above three repeated and non-applicable answers are just place holders. The questions also look like the "writers" just cut and paste phrases/paragraphs from the book without reading nor comprehending the book/chapters. If you are looking for a supplement to a textbook...this is not a good option.

I will be returning the unused and worthless book for a refund.
