Review

What a delight to have the 3rd edition of this important book! Jonathan Smith makes available the wisdom of the most savvy scholars in the field, and they in turn, succeed in communicating with clarity and coherence. This is a vital contribution to the classroom, and to the future of qualitative inquiry in psychology.
(Kenneth J. Gergen, Senior Research Professor)

As psychological science matures as a discipline, and as its focus and scope extends to address new issues and challenges for understanding human behaviour, the need for reliable and robust research methodologies increases. This third edition of Jonathan Smith's book ensures that the full range of qualitative methods are readily accessible to all researchers. The great strength of this edition lies, as it did in previous editions, in the systematic and accessible approach to the different methods. That means that researchers in psychology and related disciplines, from novices to experienced academics, can quickly understand and deploy approaches that are appropriate to answer specific research questions. Each chapter clearly outlines the essential information on theory and application. Moreover the addition of a chapter on choosing between different methods adds to the ease with which the reader can steer towards the right choice of method. No other qualitative methods text achieves this balance between theory and application while managing to maintain an impartial perspective on contrasting approaches. This is, above all, a useful book. It should be on every researcher's shelf!

(Professor Patrick J Leman)

About the Author

Jonathan A. Smith is Professor of Psychology at Birkbeck University of London, UK where he leads the interpretative phenomenological analysis (IPA) research group. He has written many articles applying IPA to

a range of areas in health, clinical and social psychology. He is co- author (with Paul Flowers and Michael Larkin) of *Interpretative Phenomenological Analysis: Theory, Method and Research* (Sage, 2009). He also has a wider interest in qualitative psychology generally and has co-edited a number of books in the area.
