Excellent reading!

By Hanlie Slabbert

I am not an expert in Second World War history or Adolf Hitler but enjoyed this book very much. Many books of this nature usually leave me with hundreds of questions – not this book. Laurence Rees wrote it in such a way that I feel I have gained an excellent general understanding of the mindset and thinking of the era in Germany. I could not put it down. I now feel that I understand Adolf Hitler, his evil nature and the Second World War much better.

I bought this book after excellent reviews from other users

By lachistera

I bought this book after excellent reviews from other users, and have seen several videos of Laurence Rees conference in Youtube.

Indeed, I wanted that: the side of Hitler's charisma, and how many people dragged.

None of that: the book is a simple (very simple) biography of Hitler, with traces of charisma, which yes, the word is constantly repeated.

As a biography, it is very shallow (the Kershaw, Bullock, etc. are thousand times better), and the charismatic aspect is very diluted.

For example: not a word, not even once, about Eva Braun. Not a mention of Hitler's Youth. Nothing about the thousands of women who were "seduced" by Hitler. And the testimony of men, very few compared with the millions of soldiers who went to war joyfully.

Absolutely nothing of the theatrical preparation of Hitler, how studying his speeches, the reactions of the audience, how was late specifically to generate buzz, mass psychology ..: That was what interested me, and this book promised: talking about the mechanisms that were used to convince, seduce, drag the Germans. And about that, absolutely nothing.

Very, very disappointing.

not what it looks like

By reviews again

Well short of expectations. Writing is boring and predictable to begin with, then he's trying to prove Hitler's charisma, by endlessly repeating the word over and over, often several times on a single page, it gets old quick and never goes away. Then he has trouble with thought organization often seesawing back and forth chronologically i.e. he (author that is) invades Poland in 1939 only to jump right back into 1938 and soon skipping the year only reporting the month of an event so reader loses track of what he's in. Too bad as

factually it seems in order, but presentation too often is a mess. Gets 3 stars for effort and seemingly thorough historical research, but if he's the Sunday Times' bestselling author, then I don't know who is not.

Having finished the book, I have downgraded it to 2 stars. Overuse of the "charisma" phrase is simply appalling, as it became the SOLE reason for everything that happened during the rise and fall of the Third Reich, according to the author of course. Hitler's charisma was his biggest friend and enemy, all around him made both, right and wrong decisions because of his "charisma" and this goes on and on. On top of that, writing style leaves a lot to be desired hence, this is just an average book by an average author. I'll leave his factual findings unchallenged as I cannot confirm or deny their relevance or correctness.
