Really Good!

By Giancarlo Domingues

The Little Green Book is a cool book, which has a lot of questions/answers, based on the content of the great Radiology Review Manual. These books are amazing and all the radiology residents, and radiologists too, should have it. Enjoy!

Best little book I have ever run across.

By NeoUnity

Wonderful book with questions oriented for new residents in radiology, residents preparing for the written and also residents preparing for the oral examination. It is even a little helpful for physics, but that is what my other little favorite book is for (Huda). You don't even need Dahnert to use or understand this book, but it helps. (I like Primer better.) I love it because it starts with a case presentation, gives a diagnosis as well as a differential and numerous questions that really test your knowledge with excellent explanations that I have found to be very accurate, up to date and with very good references.

PS

Thanks Dr. Tamm, et all!
